

CNC CORE CAPABILITIES

• **Boundary & Topographic Surveys**

High-accuracy field data collection for design, ROW, and construction workflows.

• **Construction Staking & Layout**

Precise layout for grading, utilities, paving, structures, easements, legal descriptions.

• **ROW & Easement Exhibits**

Clear, city-ready survey documentation for acquisition and permitting.

• **Utility Locates & Mapping**

responsible mapping for conflict identification and design coordination.

• **As-Builts & Verification Surveys**

Post-construction validation for plan compliance and closeout.

PROVEN CITY EXPERIENCE

CNC supports City teams with fast turnaround, accurate deliverables, field-ready communication.

- Street & roadway improvements
- Parks & recreation projects
- Utility coordination
- Staking drainage, grading & SWPPP
- ROW documentation
- Construction staking

Our workflows are built for City of Omaha expectations, including clear communication, predictable scheduling, and clean deliverables.

WHY DEPARTMENTS CHOOSE CNC

• **Fast, reliable scheduling**

We prioritize municipal timelines and coordinate directly with project leads.

• **Clear communication**

Field teams and office staff provide facts in timely updates without ambiguity.

• **Accurate, clean deliverables**

City-ready formatting, consistent layers, colors, weights, and clear annotation sized to scale.

• **Local expertise**

Deep familiarity with City of Omaha standards, ROW requirements, and utility coordination.

• **Professional field crews**

Experienced, well-equipped, and trained for complex urban environments.
